PROGETTO

# GOOGLE TAG MANAGER

Paolo Tanzini - Start2impact

#### **CONFIGURAZIONE ACCOUNT**

#### **INSTALLAZIONE GTM SUL SITO tramite codice**

- Sezione amministrazione
- Installa Google Tag Manager
- Successivamente ho copiato le due sezioni di codice e le ho incollate nel mio codice

```
<!-- Google Tag Manager -->
<script>(function(w,d,s,l,i){w[l]=w[l]||[];w[l].push({'gtm.start':
new Date().getTime(),event:'gtm.js'});var f=d.getElementsByTagName(s)[0],
j=d.createElement(s),dl=l!='dataLayer'?'&l='+l:'';j.async=true;j.src=
'https://www.googletagmanager.com/gtm.js?id='+i+dl;f.parentNode.insertBefore(j,f);
})(window,document,'script','dataLayer','GTM-WCTXQGL');</script>
<!-- End Google Tag Manager -->

</body>

#### **INSTALLAZIONE ANALYTICS**

Essendo un software esterno, analytics deve essere installato manualmente.

Per trovare il codice di analytics da inserire in GTM ho seguito i seguenti passaggi:

- sezione amministratore
- "impostazioni Proprietà" nella colonna Proprietà

Successivamente ho creato una costante su GTM

- Sezione variabile
- Nuova

- Costante

- Ho rinominato la variabile "GASV"
- Ho inserito il codice di Analytics all' interno del valore
- click su salva

Creata questa variabile, è possibile iniziare con il Tag e l'attivatore per dire cosa bisogna tracciare

- Tag
- Nuovo

- Configurazione tag
- Google Analytics: Universal analytics

#### TRACCIAMENTO CLICK

Ora questo attivatore dovrà attivare un Tag

## **HTML** personalizzato

### A questo punto creo l'attivatore

Personalmente, ritengo che Google Tag Manager sia uno strumento estremamente semplice (anche se a primo impatto non lo è affatto (2)) e completo che può semplificare e velocizzare notevolmente un lavoro complesso.

Ho deciso di tracciare i clic sulle FAQs per capire quanto è chiaro il sito e quanto gli utenti hanno bisogno di aiuto e chiarimenti.

# **FINE**Grazie dell'attenzione

Tanzini Paolo
